Wait, where did this image come from?

Deepfakes. Voice cloning. Synthetic media. It's hard to tell what's accurate and authentic these days.

**Content
Authenticity
Initiative**

Pillars of Transparency and Authenticity

Provenance

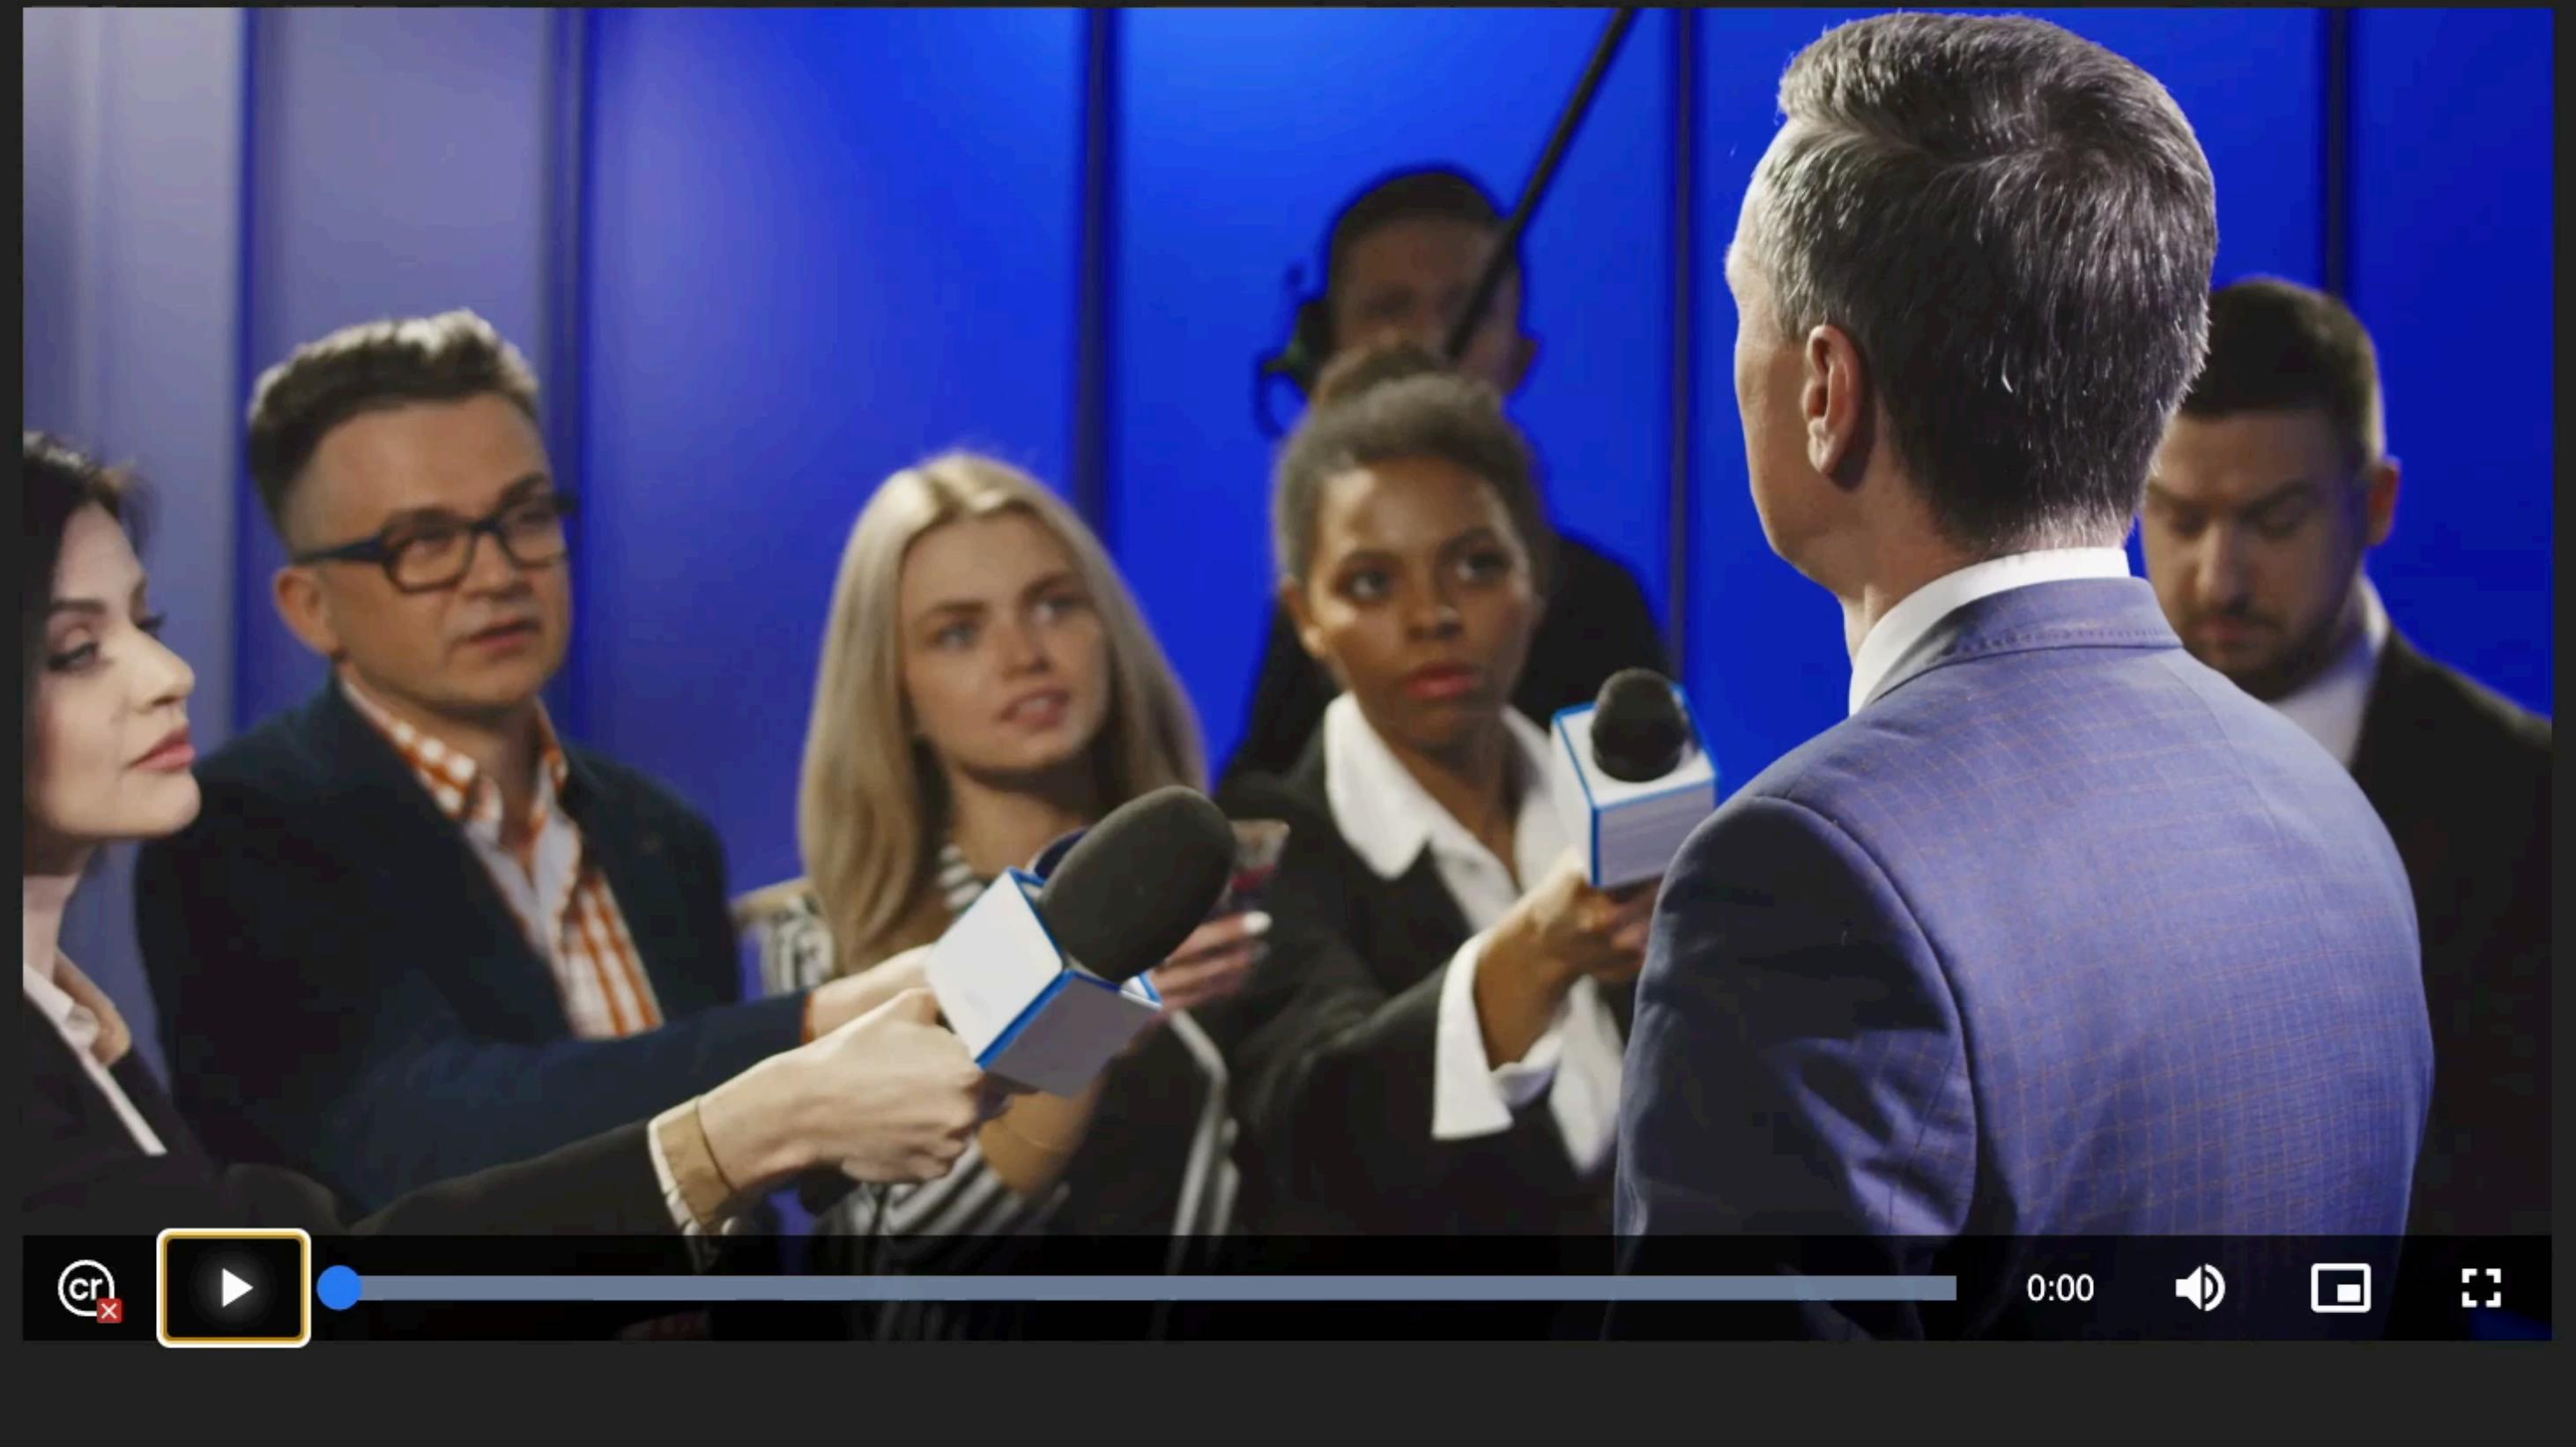

The basic trustworthy facts about the origins of a piece of digital content (image, video, audio recording, document)

Demo: How it works in Photoshop

2 Invalid video Content Credentials or assets

This sample shows how the Content Credentials player can surface important information to viewers when there are issues with a video's Content Credentials or segments within a video.

“C2PA addresses the prevalence of misleading information online through the development of **technical standards** for certifying the source and history (or provenance) of media content.”

signatures

Identity “2.0” assertion

Current work in progress

Identity “2.0” assertion

Why?

- **Ensure that identity is securely bound to content.**
 - The CreativeWork assertion in the C2PA 1.x specification did not provide this assurance and was deprecated for that reason.
- Provide new home for identity given new C2PA 2.0 core spec focus on machine-attestable content.

Identity “2.0” assertion

What?

“This specification aims to allow an actor to document their relationship to a C2PA asset produced by them or on their behalf independently from the C2PA claim generator, and to allow consumers of a C2PA asset to independently verify that the received asset was in fact produced by the named actor and has not been tampered with”

- Identity assertion specification “Design goals” section

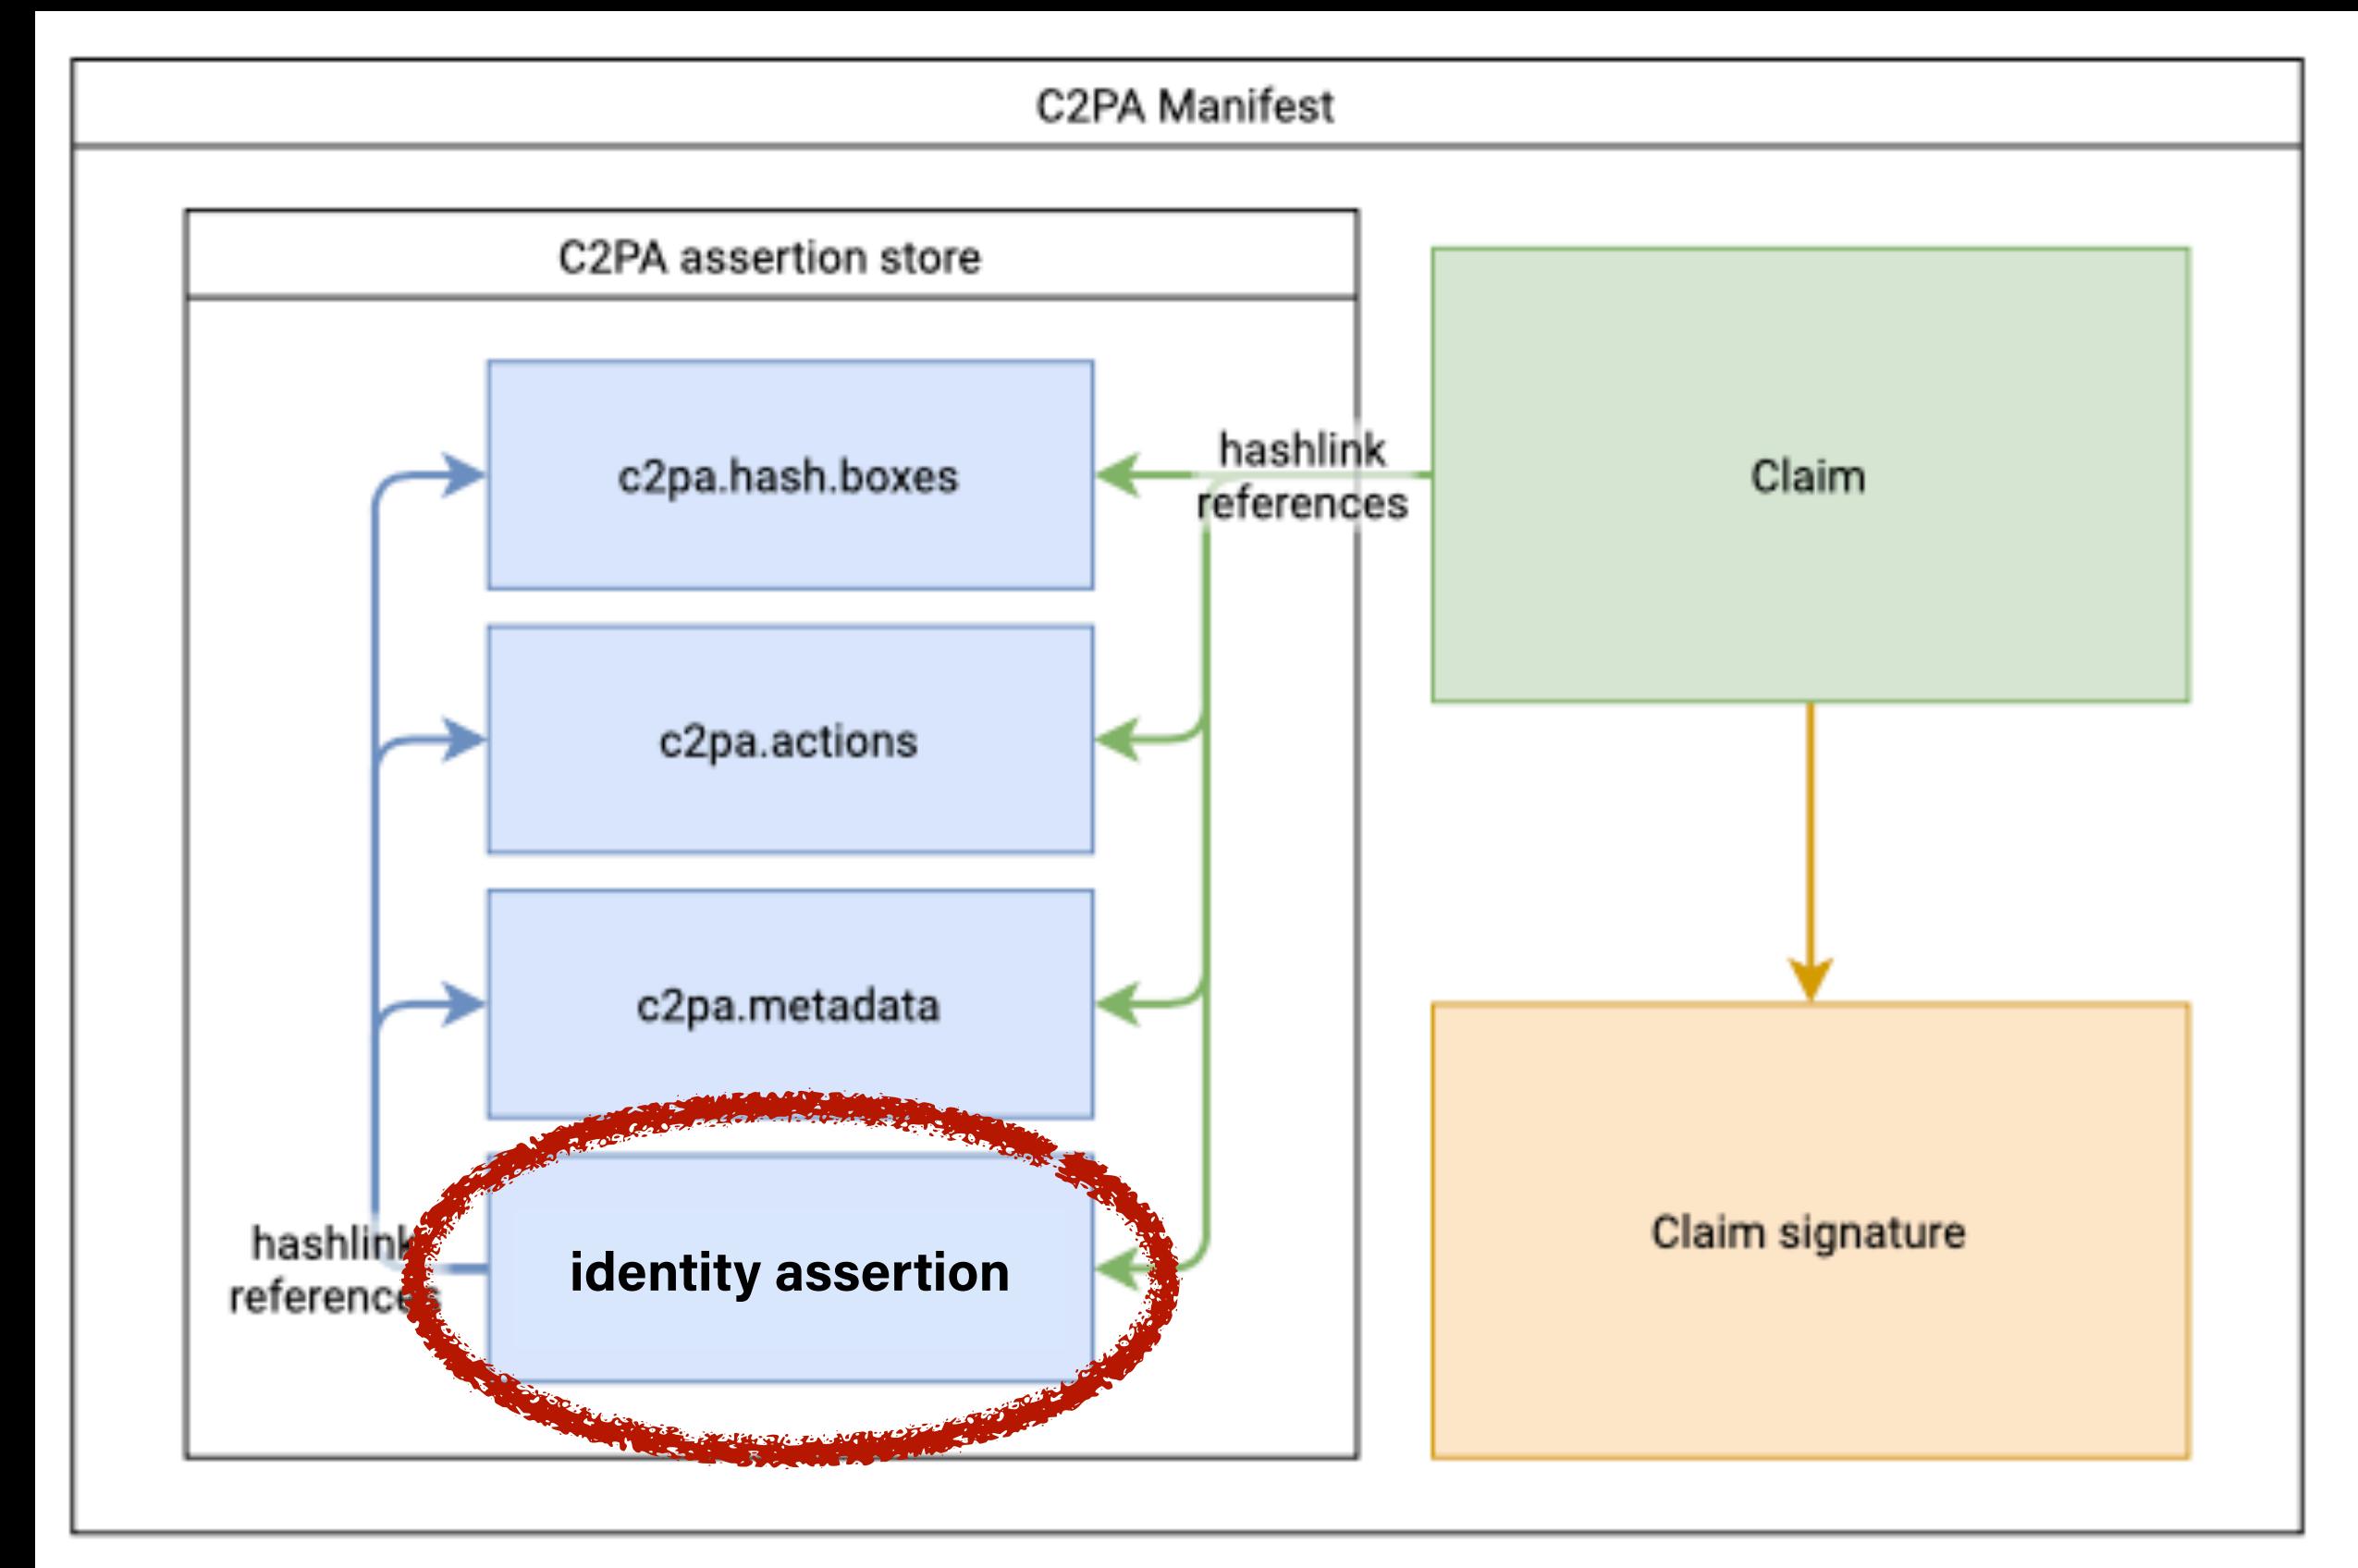

Identity “2.0” assertion

Technical overview

Identity assertion allows one credential subject to sign a **list of assertions**.

Meant to imply **subject's authorization or active participation** in production of the asset.

Additional trust signal over and above the C2PA claim generator signal.

Identity “2.0” assertion

Introducing the Creator Assertions Working Group

- <https://creator-assertions.github.io>
- Governed under **Community Specification License** process
- Will also take up the following assertions deleted from C2PA 2.0
 - Training and data mining
 - Endorsements
 - Metadata

Identity “2.0” assertion

Please join and guide this implementation!
